2025 CSC493 – Capstone Weekly Reports[1]

Your name: Easton Mason

Week: 1

Select Report Date: Aug 26, 2025

Part 1: Weekly Progress Report

- **Accomplishments**: What did you accomplish since the last class meeting?

  I have spent around 5-6 hours researching ideas for my project via ChatGPT for some examples, looking up several similar ideas that students did for similar assignments, and overall just thinking about what I would like to do. So far, I have a list of 9 potential ideas for my project, some varying in difficulty.

- **Challenges**: What are your current roadblocks?

  My current roadblock is trying to find and/or think of a project that I would find best for this class. ChatGPT and generally searching online has helped me come up with some ideas, but I may have to spend more time finding different project ideas to choose from.

- **Desired Discussion Points**: Do you have any desired discussion points that are not related to roadblocks?

  Some discussion points that I would like to bring up are the timeframe that this class follows, as I know that we have around 14 weeks to really work on the project, and that we should ideally ask ChatGPT for some advice on scheduling our project's timeline. Still, I was wondering what happens if a student structures their timeline out and completes it a few weeks ahead of time. Should they try adding more to it and polishing it out more? Another discussion point I'd like to bring up is the rubric by which this class is graded. I was wondering if the rubric for the different assignments and overall project will be listed on Moodle, as I think it would help to choose which project ideas will work best for this class and which don't.

- **Future Goal**: What do you plan to accomplish before our next class meeting? These plans should be related to roadblocks or discussion points. If you plan to change direction, explain why.

  I plan to have my project thoroughly chosen by our next class meeting so that I can start researching the various information needed to start it and eventually start working on the project heavily. Specifically, once I get my project plan laid out, I can go from an idea of a project to following the timeline that ChatGPT helped me lay out.

Part 2: Time Reporting

Make sure that as you fill out the first prompt, you include in enough detail in the summary. For example, "debugging" is vague, but "debugged function X to make sure that when user does action Y, it is called and returns the value Z" is better.

[1] Detailed Weekly Report requirements can be found here: 2024 URCPP Capstone - Using Agile and Reporting Out

Created: 2024-05-20; Revised: 2024-09-18

- **Time Spent**: Briefly explain how much time you spent on your project. If you worked on multiple components, each should get a detailed summary.

  I spent around 5-6 hours researching ideas for my project, specifically, I spent around 1 hour on ChatGPT, around 4 hours searching the internet for various ideas for capstone projects, and around 30-45 minutes writing down the ones I found most interesting in order to have a variety of options available and ready to bring to class to choose from.

- **Weekly Total Time Spent**: Make sure to add up all the hours and minutes correctly.

  So far this week, I have spent around 5 hours and 45 minutes searching up and choosing ideas for my project that best fit.

- **Total Project Time Spent**: After the number of hours and minutes, briefly explain whether you are on track and, if not, what you may need to do to achieve what you set out to accomplish.

  So far, I have spent a total of 5 hours and 45 minutes on the project, mostly researching ideas for a project that will fit best for this class. So far, I believe I am on track and can complete this project within the given time as long as the project I choose isn't too tough to research or I have some major debugging issues later down the road.

Rubric:

The following rubric will be used, but they might change as needed.

Accomplishments (3 points)

1 point for a general description of progress, 2 points for specifics on progress, 3 points for specifics AND referring to previous targets and explaining how current accomplishments build on previous ones.

Challenges (3 points)

1 point for mentioning there are roadblocks, 2 points for specifics, 3 points for specifics AND what was done already to try to overcome them.

Desired discussion points (2 points)

1 point for at least one relevant discussion point as a general question, 2 points for relevant discussion points with specifics

Future Goals (2 points)

1 point for concrete future targets (i.e. "working more on the project" is a zero, but "working on getting component X to interface with component Y" suffices), 2 points for tying in the targets with what was hopefully discussed in the meeting.

Time Spent (3 points)

1 point for including general statements of how much time was spent ("4 hours on coding"), 2 points for splitting time into specific parts ("1.5 hours on research on component X, 1 hour coding, 2.5 hours debugging"), 3 points for specific parts and details on the pieces ("1.5 hours researching Turtle interface for drawing concentric circles given inputs from the user, 1 hour coding function X that used that interface, 2.5 hours testing function X by giving it multiple values and fixing errors for values A, B, C, and D")

Weekly Total Time (1 point)

Total (Cumulative) Project Time (2 points)

1 point for summing the values correctly, 2 points for the total time AND reflection on progress (you are confident to fit the target and if not, what course corrections you anticipate needing to make)
